BRIHANMUMBAI MUNICIPAL CORPORATION

(Hydraulic Engineer's Department)

Sub:- Repairing and overhauling of five PAC pumps at Stage-III
Settling Plant, Panjrapur.

**SCOPE OF WORK, TECHNICAL SPECIFICATIONS AND INSTRUCTIONS TO
QUOTATIONER**

PREAMBLE:

Approximately 50% of the water supply to Greater Mumbai is supplied daily from Pise Panjrapur Complex. The Pise Panjrapur Complex was constructed and commissioned under Water Supply Project Stage- I, II, III and IIIA in the years 1979, 1986, 1997 and 2007 respectively. Around 2020 Million Litres Per Day (MLD) water is supplied to Greater Mumbai. Since then, the operation and maintenance of Stage- I, II and III of Pise Panjrapur Complex is being done by the department of Deputy Hydraulic Engineer (Pise Panjrapur Complex).

The Water Treatment Plant at Pise Panjrapur Complex is an important installation. This includes various plants such as Master Balancing Reservoir (MBR) Control Room, Settling Tank, Filtration Plant, Chlorination Plant, Laboratory, 100 KV Electrical Sub-Station and Pumping Station, etc. for uninterrupted water supply to Greater Mumbai, which are continuously working 24x7 without any interruption. Each plant has its own importance.

The Panjrapur Water Treatment Plant, operated by the BrihanMumbai Municipal Corporation (B.M.C.), supplies approximately 50% of treated potable water to Mumbai. The plant was developed in three stages i.e Stage I, II, and III in 1979, 1986, and 1997 by Water Supply Projects department.

Settling tanks are important part of water treatment plant. There are total 12 Nos. of Settling Tanks constructed under stage-I & stage-III by W.S.P. (Water Supply Projects) in the year 1979 & 1997 respectively. Since then they are in continuous operation from its commissioning. The installed capacity of each tank is 90 M.L.D. (million liters per day) & total capacity of 12 nos. of tanks is 1080 MLD.

Poly Aluminium Chloride (PAC) has been used as a coagulant in the water treatment process at the settling tanks in Panjrapur since 2007. The daily consumption of PAC varies seasonally, ranging from 4 MT/day during the fair season to 28 MT/day (approximately) during the monsoon.

To ensure continuous and efficient dosing across both settling stages, the “Work of Providing PAC Dosing System at Settling Tank, Panjrapur” was undertaken and successfully completed by this section in March 2022. As part of this project, five PAC transfer pumps were installed to supply PAC to five service tanks.

The PAC transfer pumps operate daily for 3 to 4 hours in rotation across both stages. Due to the corrosive nature of PAC, these pumps experience frequent breakdowns. Breakdown maintenance is currently being carried out through imprest arrangements. The pumps commonly face issues such as leakages and excessive noise, primarily due to worn out bearings and deterioration of internal components.

During the monsoon period, the requirement of PAC increases significantly because the raw water turbidity fluctuates from low to high. Under such high turbidity conditions, it is essential that the pumps remain in healthy working condition. The quality of settled water directly depends on the proper and consistent dosing of PAC, especially when turbidity levels are high. To address these recurring issues and to ensure reliable chemical dosing, the overhauling of PAC transfer pumps is urgently required.

The subject work cannot be carried out departmentally, as the department is not having the required material, specialized expertise & trained manpower. In order to prevent further damage to the PAC pumps and to ensure smooth and efficient pumps operations, so, it is proposed to carry out the work titled ‘Repairing and overhauling of five PAC pumps at Stage-III Settling Plant, Panjrapur’ by inviting quotations. This work will be carried out in accordance with the scope of work and technical specifications outlined in the draft quotation. Considering, the time required to carry out the work, the contract period is kept as Two (02) months (Including Monsoon).

I. SCOPE OF WORK & INSTRUCTIONS/CONDITIONS:-

1. The tenderer shall visit the site, preferably prior to submitting their offer to get acquainted themselves of the site condition/constraints, nature of the work involved & the actual site & work requirement. Site visit shall be done on working days (with atleast one day prior intimation) between 9 am to 3 pm (Monday to Friday) and 9 am to 11 am (Saturday) in presence of site engineer only. Site visit report as per Annexure-H shall be submitted along with Packet-B documents while submitting the tender. The tenderer shall go through the full Tender Document thoroughly and fully review the technical specifications, Bill of Quantities & nature of the work, and resolve all doubts and queries with the BMC engineers before submitting the quotation. No claim regarding this, whatsoever will be entertained at later.
2. The technical specifications for the entire work included in this quotation are prepared with care with a view not to create any additional work. However, all the items and works which are required for satisfactory completion and guaranteed performance of the system are deemed to be included in the offer and no extra cost will be paid by Brihanmumbai Municipal Corporation (BMC).
3. The various activities/components of scope of work are as follows:

5. The successful quotationer shall take out the photos before, during and after the work and submit the colored copies once the work completed and before submission of bill to the department.

6. Payment Terms: As per condition No. 17 of quotation document.

7. Penalty : As per condition No. 19 of quotation document.

8. Maintenance Gurantee & DLP

Successful quotationer shall submit maintenance guarantee for one year in prescribed format on Rs 100 stamp paper.

The defect liability period (DLP) for this work will be 1 year. During the defect liability period (DLP), the completed work shall be inspected, periodically by the site staff along with the successful quotationer and defects noticed if any, shall be got rectified immediately from the successful quotationer as per provision of contract. The above compliance report shall be mandatory prerequisite before releasing the deposits of the work. If quotationer failed to do so, Contract deposit will be forfeited.

If any discrepancy in the material supplied or work carried out is observed during erection and commissioning of the equipments or in defect liability period, and informed to the successful quotationer in writing, then the successful quotationer shall have to rectify the defect/discrepancy or replace the equipment/material at his own cost. If quotationer failed to do so, Contract deposit will be forfeited.

II. ADDITIONAL INSTRUCTIONS/CONDITIONS

1. The successful quotationer while performing the works shall take into consideration safety aspects against electrical, mechanical and health hazards to the workmen as well as safety of the installation and plan his work. The successful quotationer shall be fully responsible for any mishap, accident, etc. and compensation and claim, etc. in this regard shall be paid by the successful quotationer only.
2. The successful quotationer must have all facilities to undertake this job including adequate plant and machinery. All the material used for the work shall be new & from fresh stock. The material required for successful commissioning of work shall be approved from BMC Engineers before installation at site.
3. The work shall be carried out strictly as per the specification and as directed by the BMC engineering staff at site. The work shall be carried out with good workmanship following standard Engineering practices. Payment shall be made as per actual measurement of quantities. The contractor shall be entirely responsible for any lapse/defects/mishaps/discrepancies in the contract work.
4. The required & sufficient manpower (of required skillset, best knowledge and having requisite qualifications), with required material, wherever necessary shall be arranged by the successful quotationer. The successful quotationer shall not employ the person below 18 years of age.
5. The electric power & water supply required for carrying out works shall be made available by BMC. However, necessary arrangements to get the same upto the site shall be made by the successful quotationer. And any breakages/damage to these equipment shall have to be borne by the successful quotationer.
6. No escalation (extra/excess) in the cost of whatsoever nature will be allowed and in case of any dispute, the decision of BMC will be final and binding to the successful quotationer.
